## Overview

Jouse2™ is an advanced joystick-operated USB mouse that you control with your mouth.

Just move the precision joystick with your mouth, cheek, chin or tongue to shift the mouse cursor wherever you want. The further you move the joystick, the faster the cursor travels. You can perform right-click, left-click and double-click actions with the sip and puff switches built into the Jouse2™.

The Jouse2™ requires minimal action. Cursor movement is fast, smooth, and very accurate, which is great for drawing or playing games.

When combined with on-screen keyboard software, the Jouse2™ lets you type and use other keyboard functions.

Jouse2™ mounts to almost any desktop via an easily adjusted advanced articulated arm that swings safely out of the way if bumped.

The all new Jouse2™ is now based on USB technology providing much easier configuration and cross platform compatibility.

Compusult offers custom Jouse2™ mounting hardware, switch controls, and interfaces for any special needs.

## The Computer Access System that Attaches to Your Desk, Not to You!

## Features

- ✓ Jouse2™ has been completely redesigned, with fully updated and improved hardware, electronics and firmware providing all conventional mouse operations in a compact, integrated unit.
- ✓ Jouse2™ has a USB interface to make it truly plug and play working on all operating systems and platforms offering USB support, including Microsoft Windows, Macintosh OS, and Linux.
- ✓ With Jouse2™, nothing is attached to you. You don't have to wear anything just to control your computer. The Jouse2™ gives you greater independence.
- ✓ Jouse2™ has accurate tracking combined with extremely smooth operation, providing an ideal mouse replacement for drawing or any application requiring fine cursor control.
- ✓ Jouse2™ includes an advanced, infinitely adjustable, articulated 3-joint arm with a single dial lock that mounts easily to almost any desktop.
- ✓ It operates independently of any other USB, PS/2, or serial mouse enabling the use of multiple pointing devices on your computer.
- ✓ No external power supply is required, eliminating tangled wires and making it more portable.
- ✓ Comes with a one-year return-to-depot warranty and free technical support. Extended warranties are available.

## System Requirements

Jouse2™ emulates a 2-button USB mouse and works with any personal computer supporting the USB interface and protocols. Just plug it in, and Jouse2™ will configure itself to work with your particular computer. It couldn't be easier!

Jouse2™ will work with any PC running Windows 98SE™ or newer including Windows 2000™, Windows Me™ and Windows Xp™; Most PCs running Linux that supports the USB interface; and any Macintosh™ computer that supports the USB interface.
